

Jask

COMPANY PROFILE

JASK - YOUR TOTAL PROJECT SPECIFIER & SUPPLY SOLUTION FOR ARCHITECTURAL DOOR IRONMONGERY, SLIDING FITTINGS, ACCESS CONTROL LOCKING SYSTEMS, BATHROOM ACCESSORIES AND INTEGRAL PRODUCTS.

WHO ARE WE

JASK a brand originated in Agueda - Portugal. A brand with an exclusive trademark. A company that is under a strong European ownership for over more than 15 years and increasingly viewed by its esteemed clients as a company focused on innovation, quality, growth and fair value. A company who is constantly working on both the product line and the business model to enhance relationship with clients.

We offer high quality products - suitable for both commercial and residential usage. The products are available in a wide range of different finishes and in many combinations which makes **Jask** a versatile brand. **Jask** products are designed for heavy usage and is the best for high traffic areas.

MESSAGE

"To be increasingly close to our ideals, we are constantly improving our collection and organization in order to simplify the relationship between our customers and our company.

The need for supplying added value to the projects and clients in the building process have grown significantly. Over the recent years wide range of manufacturer's have started establishing themselves directly in the market, the customers are demanding strong secured brands that can add reliable value to the project with a broad spectrum of products.

At **Jask Trading LLC** - Dubai we know exactly what is the project demand and what the customers are looking for in a supplier. Like we always say , we care about your business and take pride in delivering beyond what our customers expect from us. I take pride in saying that it is this that has made us a preferred project supplier in the industry.

We innovate and grow up with value and quality to better serve our clients and projects.

"Quality only happens when we care enough to do the best".

THE CORE IN OUR BUSINESS

OUR SERVICE CONCEPT

The core of **Jask General Trading LLC** is our first class high end service concept.

We can offer our assistance in the entire process of specifying, procuring, installing and doing service and after sales. With our in-depth knowledge of the many products and brands available on the market and not the least, the expertise on how to combine them with the many security and standard requirements, we are able to tailor a specific product package just right for your project.

Furthermore, we pride ourselves of being able to solve any product related issue you may have. With our experienced and talented staff and our large supplier set-up, we are able to find a solution to any product or supply related issue - and to deliver you exactly the product that you need.

SPECIFICATIONS

WE MAKE IT EASY

At **Jask General Trading LLC**, we offer to do your specifications for you. We know that doing specifications today can be very time consuming and resource-intensive - and as the complexity of legislation, local laws and demands and the tremendous selections of products are intensified - it does not seem to lessen in the future.

Expert, impartial advice is the cornerstone in our specification service.

At **Jask General Trading LLC**, we have the ability, the expertise and the necessary resources to handle any specification you may have.

We will provide a full service specification, where we specify all of your products according to architect plot work, chart book and site inspection. We make our specifications according to local requirements and each specification contains the following information.

CUSTOMIZED PRODUCT OFFERINGS

OUR WORK SEGMENTS

FIVE MAIN SEGMENTS

At **Jask General Trading LLC** we operate within 5 main construction segments

Health care

High Traffic

**Leisure /
Hospitality**

HEALTHCARE

Within the healthcare segment, we cover all sub segments from the very large hospital, to pharmacies, to dental clinics and special care units. A healthcare solution could include technical doors, special products with antimicrobial coating, ironmongery suitable for very heavy usage, anti-ligature hardware, a special security package that considers the security of multiple access routes and the need to accommodate permeability for visitors and not least the need for special care products.

HIGH TRAFFIC

The characteristics of the high traffic is a constant flow of many people and the main challenge is often to install products that can accommodate the constant pressure. In the high traffic area, we always analyze the cycles needed for optimal servicing of the installed products. This could include high traffic washroom systems with the most optimal combination of modules, easy access, easy maintenance and hygiene as cost and effectiveness always is at the essence.

Residential

LEISURE / HOSPITALITY

The Leisure / Hospitality segments covers everything from major hotels, ice skating arenas, major stadiums to public swimming pools. For buildings within the leisure segment, we find solutions that are suitable for wet environments and/or heavy usage. Partition walls that can divide a gym area or room into smaller usable sports courts/areas are frequently part of the leisure segment.

RESIDENTIAL

Privately held or a public building faces the same challenges when we speak of housing, as ever higher demands are set to our living standards and the buildings we live in. We understand what it takes to specify a complete villa or condominium from entrance door and frame, to residential and individual ironmongery, personal security in cylinders all the way to the modern bathroom.

We have products in our portfolio specializing in door solutions for safety, smoke and fire as well as steel/garage doors. Our professional team of project managers have supplied many villa and residential projects and are therefore ready to assist on new job n hand projects.

OFFICE

Offices contain sensitive information and valuable information. At the same time, hundreds of people has to be granted access to various areas of the building throughout the day. This put emphasis on the security system and our office solution would include a master key and access control systems Here we, among other things consider special high security areas and exit and escape routes, as they should not compromise the security. Signage and railing systems are often also part of the office segment.

For all types of buildings, it is applicable that we tailor a product offering comprising a comprehensive door program that fits the quality required, function and esthetics of the building project. We have skilled suppliers and a technical staff experienced in the specification of exactly your type of building.
